

CH Player V2

Welcome to Cock Hero Player version 2.

CH Player is an easy to use yet powerful and intuitive player for playing Cock Hero Video and e-stim audio files.

This player just start VLC with command Line and play e-stim audio from selected Audio Device.

Then the Audio E-stim file is sync with Video file. Ex. the VLC can play MP4, MKV etc.

And the Audio E-stim file must be in MP3 format. It is also possible to play Video from an URL

News

New in Version CH Player V2 is that you can use a separate Audio Device for Second Sound Output.

Ex. USB Audio Adapter.

Automatically Install Pornhub plugin from Web site.

Also added this help file.

System requirements

Operating system:

Desktop version 32-bit or 64-bit version of Windows 10, Windows 8/8.1, or Windows 7.

Other system requirements:

USB Audio Adapter.

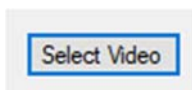

MP3 Files that you have to find at <https://milovana.com/> or other links.

MP4 Files that you have to find at <https://www.pornhub.com/> or other links.

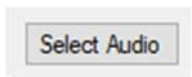

Main menu

This is the main menu and there is File, Setup and Help menus on the main menu.

And there is some bottoms that can play the Audio and Video.

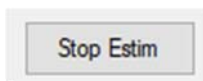

This bottom is use to select the Video file to play in VLC. Same as using the File Menu.

This bottom is use to select the E-Stim Audio file to play in this program. Same as using the File Menu.

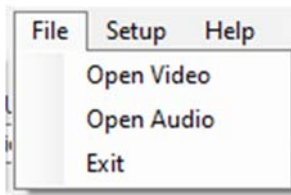

This bottom is use to play the Video and the Audio file.

This bottom stop the E-Stim file that is played from second Sound Adapter or selected Sound Output.

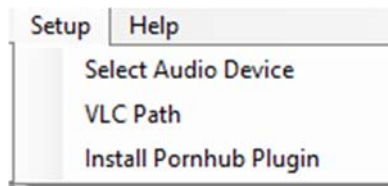

File

In the file Menu there is Open Video, Open Audio and Exit.

- Open Video is show a dialog for what Video file the VLC should play
(Same as bottom on main menu)
- And the Open Audio is to open a dialog for selecting the E-stim MP3 file that this program should play to a second Sound Adapter.
(Same as bottom on main menu)
- Exit is of course the End of program. (You have to manual end VLC to)

Setup

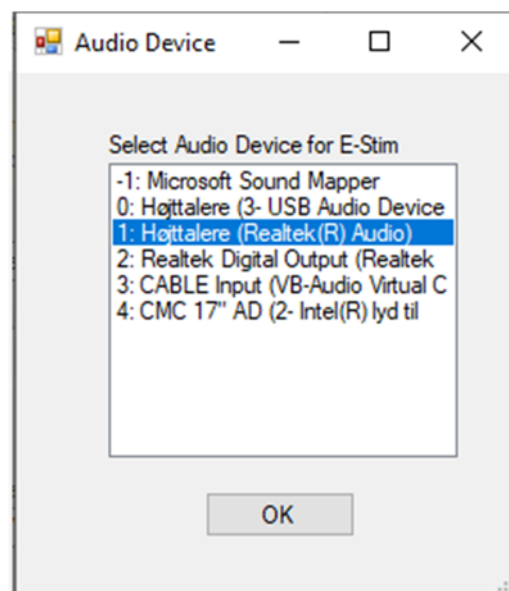

In the Setup Menu there is Select Audio Device, VLC Path and Install Pornhub Plugin.

Select Audio Device

- Select Audio Device is to select the second Audio Device for ex. E-Stim Audio. Or it is possible to select the default Audio in Windows to send to USB Audio Adapter and the play E-Stim through PC Internal Audio adapter if this is best for E-Stim Audio.

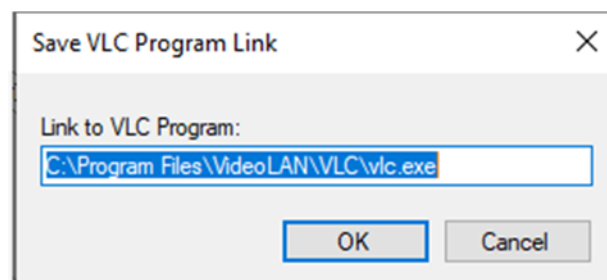

Ex. of selecting Second Audio Device.

VLC Path

- Setting the default link to where VLC player exe file is installed. The default place is C:\Program Files\VideoLAN\vlc.exe.

This has only to be setup for the first time. The link is save in the registry.

Install Pornhub Plugin

This will automatically download pornhub plugin from VLC Website: <https://addons.videolan.org/p/1236338/>

Pornhub VLC Playlist Parsers

Source (link to git-repo or to original if based on someone else's unmodified work): Add the source-code for this project on opencode.net

This will automatically download files from VideoLan <https://addons.videolan.org/p/1236338/>

And then the Pornhub plugin will be downloaded to VLC Application folder. It will then place the file pornhub.lua file in

C:\Users\yourusername\AppData\Roaming\vlc\lua\playlist\

If the folder does not exist it will be created. If for some reason it can't install the file it will throw an error message.

Help

This shows this help and the About Windows for the Program.
